Dear authors,

we have the following recommendation about your submission
to ICoSTEC2023 entitled

"Classification of Shape Bean Coffee Using Convolutional Neural Network "

Editor Suggestions:
- The authors should improve the paper using the ICoSTEC format and write the revised manuscript carefully. We will resend the uncorrected-format manuscript via email if it needs to be revised.
- We found several error terms in this manuscript. Please correct the terms using advanced tools like Grammarly.com

Reviewer Comments:

To improve your paper's quality to fit the article requirement at the ICoSTEC conferences, the author(s) should revise the paper in several parts:

1. In Chapter 1, the authors must present the background of the study. Why this study using CNN is important in image classification research. The author did not explain the main problem of Coffee bean classification using obsolete techniques.

2. Add more related works in Chapter 2. This explanation lacks novelty, so it requires to be improved in the next revision. In Chapter 2, to increase the quality of the manuscript, the authors must add the current related works as the baseline of this research. Most updated papers are needed to support the author's idea to construct a classification model of Coffee beans.

3. The proposed algorithm CNN is a common Deep Learning architecture in machine learning. Thus, the authors must explain the significance of the algorithm in dealing with the classification problem.

4. In Chapter 3, the authors described the experimental result of CNN + Adam Optimizer in a short description. However, the authors didn't show the training and testing accuracy and loss table. The authors can improve Chapter 3 by adding a table to display the accuracy and loss of the proposed architecture.

5. Chapter 4 (Conclusion) needs to be improved. The conclusion must display the manuscript's objective, technique, and the result of the experiment in 2 or 3 paragraphs.

6. Authors must support this manuscript using international sources (articles from Internation Journals and Conferences) to support the manuscript.

Please re-submit the revised version soon.

Best regards,
ICoSTEC 2023 Scientific Committee
