

CHAPTER V

CONCLUSION

5.1. Conclusion

Referring to the research findings in the previous chapter, finally the conclusions of this research can be stated as follows :

1. Based on the data analysis by using Product Moment Correlation Coefficient, there was a significant correlation between critical thinking and students' writing descriptive text of the seventh-grade students in SMPS Al-Washliyah 26 Medan.
2. Based on the statical of regression analysis that there was a significant influence of students' critical thinking toward students' writing descriptive text of the seventh-grade students in SMPS Al-Washliyah 26 Medan.

5.2. Suggestion

Based on the conclusion of the research findings, here was the suggestion :

1. The students will be able to communicate their thought and opinions in writing form by critical thinking by gaining and selecting appropriate ideas.

Although there was a significant correlation between critical thinking and students' writing descriptive text of the seventh-grade students in SMPS Al-Washliyah 26 Medan, critical thinking should be developed more to make the students are able to communicate or express their thought and opinion in writing descriptive text and

writing descriptive text could be more practice to increase students' writing ability with appropriate ideas.
