

CHAPTER V

5.1 Conclusion

This research used the Look and Say method as a medium to improve students' speaking skills. This research was conducted in two cycles consisting of two meetings for every cycle. In both cycles, the researcher applied Flash Card of picture material as well provide explanations and directions to students in practicing students' ability to spoke English. That Research started on August 24, 2023 until August 31, 2023.

Based on the research that had been done by researchers before, it could be concluded researchers obtained qualitative data and quantitative data, the results show increasing student skills in students' ability to speak English using the Look and Say method, there were 90% who meet the minimum completeness criteria. These results were coming from data in cycle I and cycle I. In cycle I, pre-test I numbered 4 students who succeeded with a percentage of 12.5% and 10 students who were unsuccessful with a percentage of 31.2 %, and in cycle I there were 6 students succeed with a percentage of 18.8 % and 4 students were unsuccessful with a percentage of 12.5%, so in cycle II there were 14 students who succeeded with a percentage of 43.8% and 3 students were unsuccessful with a percentage of 9,3% on post-test II.

Qualitative data was also obtained by conducting, observing, interviews and take field notes. Classes had become more interesting and students very active in learning English, especially speaking skill by using look

and say method. It could be concluded that the Look and Say method is effective for students' skills in improving students' ability to speak English in class VII-2 at SMP Sinar Husni Medan. This was proven by significant difference between students' mean scores on the pre-test and post-test activities in Cycle I and Cycle II.

Thus, it could be concluded that the use of Look and Say method was effective to enhance speaking ability.

5.2 Suggestion

1. For English Teacher

For English teachers, it was suggested to English teachers to use Look and Say method in the learning process to enhance students' speaking ability because the use of the method is beneficial to the development of students' speaking ability. Besides, the use of this media also encourages students to be more Active, creative, smart, and interested in following the learning process in the classroom.

2. For the Researcher

It is hoped that the results of this research will be an encouragement for other researchers to do the same research in the future related to students' speaking skill or used Look and Say method for other skills. Further researchers are advised to use Look and Say method at various levels of education such as junior high school, school level to see the effectiveness of using the look and say method in its used.
